

Practice Guidance at the CRNA

Practice guidance is for anyone that has questions about standards of practice, the *Code of Ethics*, continuing competence and registration.

Anyone can ask for practice guidance at any time, relating to:

Standards of Practice: Understanding the CRNA's standards of practice, their intent and what registrants are accountable for across different practice settings.

Code of Ethics: Applying the *Code of Ethics* to generic nursing scenarios to ensure ethical decision making in practice.

Continuing Competence Requirements: Meeting the continuing competence requirements necessary for annual permit renewal.

Registration Requirements and Policies: Navigating registration requirements and understanding relevant policies for maintaining good standing with the CRNA.

The CRNA cannot provide practice guidance related to specific practice scenarios or questions that would be covered by an employer's policies or procedures.

Scan the QR code or visit **CRNA.com** to submit a practice guidance request.

Your question will go directly to a team of registered nurse consultants, who will answer your inquiry and guide you to the tools you need to make an informed decision about your practice.
